

HAVE YOU EVER WONDERED "WHY TAIGA"?

Our new Calgary yard video gives you a taste of why we do what we do, why we are committed to "Whatever it takes", and why you should care. Hopefully our daily interactions are positive proof that we do care about your business, but maybe a good video will help. Get the popcorn ready and press play.

taiga exterior wood - pressure treated wood

Content courtesy of Viance

Pressure treatment is a process that forces wood preservatives or fire-retardants into the wood. These processes are considered the best and most effective method to extend and preserve timber life. Preservatives protect the wood from attack by wood ingesting insects; like termites, and wood rot caused by fungal decay. Fire-retardant treatments help the wood to quickly char when exposed to flame, reducing the smoke and flame that occurs in a fire.....
