DryBarrier®

Where there is concrete, there is moisture that can cause dangerous mould and poor air quality, if in direct contact with your flooring.

DryBarrier® subfloor system provides a mould and mildew moisture barrier to protect against damage and to add warmth to finished floors on concrete slabs. Convenient and simple to install, DryBarrier® makes it easy to transform a cool, damp area into a welcoming, safe living space for your family.

taiga news

IronMan 70.3 event, Mont-Tremblant, QC

This event consists of a 1.9 KM swim, a 90 KM bike and a 21.1 KM run. Each segment alone would take your breath away, but in June 2019, twelve of our Taigans competed in, and completed the entire gamut! It was not without struggle, and we learned that the swimming portion proved to be the most difficult obstacle this year, due to the turbulent waters. It's great to see our team members collect together for this challenging event, and we're very proud of how they represented themselves and the company. Congratulations to all Taigans that participated!
